PATIENT RELEASE OF LIABILITY

Given the circumstances surrounding the spread of Covid-19 and the data available thus far, we want you to understand that 80- 85% of all Covid-19 infected patients are either without symptoms or mildly symptomatic. This means that they may not recognize that they have had Covid-19 or are currently infected with Covid-19. These symptoms may be as subtle as runny nose, mild sore throat or occasional cough, mild malaise or smell changes without any fever or shortness of breath or significant cough. The last three are cardinal symptoms of Covid-19 but may be absent in early Covid-19 or in asymptomatic or mild Covid-19. Given that background, some patients will not have fever on screening and are negative on the screening questionnaire, there is potential exposure to Covid-19 in our office. We maintain safe distancing and cleaning protocols in our office as per guidelines including patients and employees wearing masks.

By signing this form, you agree to release this office and Dr. Umang Khetarpal of any liability from getting infected by Covid-19 in our office.
